

# PROMT

## Translation Server 19

### SECURE MACHINE TRANSLATION

A multi-purpose platform for translating documents, business correspondence, websites and any texts in corporate network

#### CONFIDENTIALITY

data leakage risk reduction due to not-usage of online translation services

#### EFFICIENCY

improving productivity of employees up to 40% while working with documentation in foreign languages

**EASE OF USE**  
instant translation in any Windows application via PROMT Agent

**OFFLINE MODE**  
no Internet connection required

#### FLEXIBILITY

customization tools for accurate translation are adapted to the customer's business needs

## TRANSLATOR CAPABILITIES

### TRANSLATION EVERYWHERE DESIRED

The PROMT Agent allows for translating without switching between application screens. Simply select a word or a text fragment in any program (MS Word, Excel, PowerPoint, Adobe Reader/Acrobat, browsers, messengers) and the resulting translation will appear in a popup window next to the original text.

### TRANSLATION OF DOCUMENTS WITH JUST ONE CLICK

The translator application takes into account the type and subject matter of the document, preserves the formatting, style and terminology. It supports translation of documents of different formats - doc(x), xls(x), ppt(x), rtf, html, xml, pdf, bmp, jpeg, .odt, .ods.

PTS optimizes the work with documents in foreign languages and cuts the time of translation of reports, presentations, marketing materials.

### EVERYTHING YOU NEED FOR TRANSLATION IN ONE APPLICATION

An accurate translation of texts of any size, modern general purpose dictionaries and specialized science- and industry-specific dictionaries are designed to support the translation of subject-specific texts.

### SUCCESSFUL CORRESPONDENCE WITH CUSTOMERS AND PARTNERS

Translation of entire letters from a foreign to the native language and vice versa while translating words and single sentences, directly in the mail client is now possible via PROMT Agent.

### INTEGRATED REFERENCE RESOURCES

PTS includes an expanded and updated general vocabulary with tips when entering a word and a convenient search including morphology, as well as a large database of examples of translations made by professional translators on various subjects.
