

RELIABILITY. PERFORMANCE. FLEXIBILITY

PROMT Neural Translation Server 22

A turnkey platform for translation of any documents and texts based on a cutting-edge server solution for companies and organizations of any size.

Over 20 years of product life have made PROMT Neural Translation Server a technology leader among its peers in the international market.

RELIABILITY

PROMT solutions work offline, do not access third-party services and guarantee the confidentiality of any translated data. PROMT machine translation is a reliable partner in working with information in foreign languages.

FLEXIBILITY

All PROMT solutions can be further customized, and using API and ready-made connectors, machine translation can be part of your business process. Advanced AI technologies will take on routine tasks and minimize the human factor.

QUALITY

Advanced technology allows you in a matter of seconds to get a coherent, fluent and accurate text in foreign language, that doesn't require human editing.

PERFORMANCE

PROMT translation speed is 100 words per second and higher - no professional translator can work at this speed. The quality of translation is comparable to human translation, it requires almost no post-editing, which allows you to work directly with the final data and ensure high productivity.

- High generic quality of translation based on neural networks
- Turnkey platform with ample opportunities
- Scalable translation in real time
- Flexible deployment on premises or as a cloud
- Full control over your data without the risk of confidential information leakage
- Adaptation and customization for your business
- Integration with popular CAT systems - SDL Trados, Memsource, Across

SmartND TECHNOLOGY

Unique technologies for lexical customization of neural translation. The system can be trained on previous translations and even glossaries.

FEATURES

With PROMT Neural Translation Server you can accurately translate documents of any type: instructions, contracts, technical and design documentation, analytics, reports, manuals, press releases, news, chat messages, e-mails and websites.

TRANSLATION WITHOUT MACHINE ACCENT

Accurate and high-quality translation of texts of any size. Neural translation within closed network for Windows and Linux.

WORKING WITH DOCUMENTS IN 1 CLICK

Instant translation of documents while preserving the original style and formatting. Supported formats: doc(x), xls(x), ppt(x), rtf, html, xml, pdf, bmp, jpeg, odt, ods.

MUST HAVE FOR TRANSLATION DEPARTMENTS

Integration with CAT systems along with flexible customization options help you speed up professional translation of documents by up to 35%

EASY ADMINISTRATION

Powerful yet easy-to-use administration tools, integration with Microsoft Active Directory.

TRANSLATION WHERE YOU NEED IT

PROMT Agent allows for translation without switching between screens. Select a word or text fragment in any program, and the translation will appear in a pop-up window next to the original text.

FAIL-SAFE AND EASILY SCALABLE

Increased stability even under heavy loads, high-speed scalability for maximum time saving.
