

# PROMT Neural Translation Server 21

TECHNOLOGY. PRIVACY. CUSTOMIZATION

A turnkey platform for translation of any kind of content (documents, emails, presentations, websites) powered by machine learning and AI innovations.

Over 20 years of product life made **PROMT Neural Translation Server** a technology leader among its peers internationally.

## EXPERTISE

PROMT specialists are among the best experts in machine translation worldwide. Successful customer experience since 1991 helps dealing with challenges of any complexity. Choosing PROMT, you can be sure of the best outcome for your specific business needs.

## CUSTOMIZATION

A distinctive feature of the 21 version is its ability to be trained and customized for any language pair for improving the quality of translation and adapting the technology to highly specialized content. The 21th version includes a unique Smart Neural Dictionary tool which helps master and control terminology in your texts. The key points are that no grammatical information is lost and dictionary interface is user-friendly.

## QUALITY

PNTS delivers natural-sounding translation without machine accent within seconds. State-of-the-art hybrid NMT technology offers coherent, fluent and accurate translation for the most demanding languages, that doesn't require human editing.

## PRIVACY

Only an offline translation system can guarantee that the documents and texts you translate are secure and confidential. There's no cloud or online service that guarantees you a 100% security. The PNTS can be deployed either on premises or in a private cloud, with out-of-the box integration to your active directory, to ensure corporate information stays secure.

- Impressive quality of translation based on neural networks
- Turnkey platform with ample opportunities
- Scalable translation in real time
- Flexible deployment on premises or as a cloud

- Full control over your data and minimization of risk of sensitive information leakage
- Adaptation and customization for your business
- Integration with popular CAT systems - SDL Trados, Memsource, Across

## SmartND TECHNOLOGY **NEW**

Unique technologies for customizing the neural translation lexically.

The system can be trained on previously translated data or even glossaries.

The high marks from the experts of the Association for Computational Linguistics (ACL) for PROMT Technology

Partner of DANTE project funded by the European Commission

## WHAT YOU GET

With PROMT Neural Translation Server you can accurately translate documents of any type: instructions, contracts, technical and design documentation, analytics, reports, manuals, press releases, news, messages, emails and websites.

### TRANSLATION WITHOUT MACHINE ACCENT

Accurate and high-generic translation for texts of any size

**NEW! Neural translation within closed network for Windows and Linux**

### TRANSLATION OF DOCUMENTS IN 1 CLICK

Instant translation of documents while preserving the original style and formatting.

Supported formats: doc(x), xls(x), ppt(x), rtf, html, xml, pdf, bmp, jpeg, odt, ods

### FAIL-SAFE AND EASILY SCALABLE

Higher stability even under heavy loads, high-speed scalability for maximum time saving

### MUST HAVE FOR TRANSLATION DEPARTMENTS

Integration with CAT systems along with flexible customization options help you speed up professional translation of documents by up to 35%

### TRANSLATION WHERE YOU NEED IT

PROMT Agent allows to translate without switching between application screens.

Choose a word or text selection in any program, and you'll see the translation in a pop-up window next to the original text

### EASY ADMINISTRATION

Powerful yet easy-to-use administration tools, integration with Microsoft Active Directory
