PROMT 19 - additional setup for free!

All buyers of PROMT Translation Server 19 will get the Pilot Project on customization from PROMT experts for free!

What is a Pilot Project?

It is a project on customization of PROMT solution for your business translation needs

Within 40 hours PROMT experts will:

- assess the quality of translation on your materials or on the subject domain
- develop specialized dictionaries based on your texts or on self-selected material
- demonstrate the Pilot Project results and provide best practice advice on setting up **absolutely for free**

You will receive:

More precise and correct translation of texts typical for your industry.

Upon completion of Pilot Project you will be provided with an additional component: a translation profile that includes dictionaries, Translation Memory database and other settings for your PROMT Translation Server solution.

With a customized translation, your specialists will be able to work with any information in foreign languages even faster and more comfortable!

To order PROMT 19 with Pilot Project send your request to corporate@prompt.ru or contact your personal PROMT manager/
